

Verti-Gro® Home Garden System

ENJOY CLEAN, ALL-NATURAL HOME GROWN PRODUCE!

The **Verti-Gro® Home Growing System** comes complete with everything you need to start growing healthy vegetables, herbs, and fruits at home, including a nutrient tank, pump and timer. Our complete recirculation systems allow all of the nutrient solution to be re-used and once it has been absorbed into the roots, simply refill the tank. Our Home Garden can be placed outside on a patio, in a sunny spot on the lawn or in the garden. The Home Garden can be moved easily and the pots can be removed and taken inside should weather conditions become severe (too cold, too windy). Each Home Garden comes with our specially formulated plant food and gourmet seeds (upon special request) and a seed starter kit. Our patented 5-foot-tall vertical garden allows you to grow up to 20 plants in less time than it takes in soil with no pesticides!

Benefits:

- Soil-less system means there is no soil-borne diseases or pests
- Hydroponic means no wasted water, nutrients or energy
- No gardening experience is necessary
- Verti-Gro enjoys 15 years as the leader in hydroponic growing systems
- Home Garden fits easily on sunny patios, decks or rooftop gardens
- Grows many fruits and almost all vegetables, herbs or flowers
- Purchase an add-on kit and grow up to 28 plants in one Home Garden
- Uses 85% less water and 50% less nutrients than soil-based gardens
- Uses 50% less energy than similar aeroponic tower gardens
- Costs 50% less than other home growing tower gardens
- Produces clean, all natural home grown produce without pesticides
- Natural produce grows faster than it takes to grow in soil
- Growing season can be extended in colder climates with a submersible heater (purchased separately)
- Made from safe food-grade EPS
